

“The whole purpose of education is to turn mirrors into windows.” – Sydney J. Harris

The Value of Education

Centre for Arts and Technology believes that what we give to our students will then be given to the world. Modern facilities, industry-proven instruction, career preparation and guidance – all of these aspects blend into your educational experience to help you reach your full potential. Because it isn't just about what you will learn, it is about who you will become.

The Centre does things differently than traditional colleges, with all of the focus being on the student. Program start dates are offered quarterly throughout the year giving you the choice of when to pursue your education, and programs run continuously to keep the learning river flowing and get you into your career sooner. We take advantage of modern technologies and use industry-relevant equipment to provide you with the best training. We don't just teach; we uncover, instruct, guide, build, develop and polish.

START SOONER

Many programs start multiple times a year, giving you the choice of when to start. Better yet, you don't have to wait until the fall.

FINISH QUICKER

Our rolling programs mean that you complete your education sooner and have the ability to get into your field of study and start earning a salary.

Your education is likely to be one of the most significant investments you make in your life. And it should be. A solid education gives you the tools and confidence to move forward in your career and gives you the skills to be successful in life. We think that sounds like a pretty good thing to invest in.

It's difficult to understand what the true cost of education is. Many colleges and universities don't necessarily provide you with all of the financial information you need. Centre for Arts and Technology believes that the value of our programs far outweighs the cost, but we're happy to break it down for you because after all, you are investing in yourself and aren't you worth it?

IMPROVE YOUR CHANCES

Because our programs start throughout the year, that means that they finish throughout the year as well. That means that you don't enter the job market the same time as typical college grads giving you the edge.

SAVE MONEY. REALLY.

Because our programs take under 2 years to complete, you end up saving on living and housing expenses that a typical 4-year university degree would cost you.

Most people think of a typical post-secondary school year as running from September to April with four months off during the summer. And what happens during those four months? You end up taking a job that doesn't pay well, isn't related to your field, and although you try to save money, you end up right back where you started. At Centre for Arts and Technology, our programs run 12 months of the year, which

means that you can stay focused on your studies and complete what could normally take four years in two years. You'll graduate sooner and save up to two years of living expenses.

	How Long	Cost Per Month July Start	Cost Per Month October Start
3D Animation	21 months	\$1,431	\$1,533
3D Game Animation	24 months	\$1,437	\$1,547
